4.2.1- The Central Library of the college has valuable collection of more than fifty three thousand of books of the diverse subjects which cater to the needs of students, teachers and research scholars of different UG & PG level programmes. The faculty members of the college also assist in smooth functioning of library. There is a reading section attached with the library, so that students and staffs can read library books, journals, magazines, Newspapers as well as competitive examination books. The students are allowed to have issued full set of books (08Books for PG Students, 06 Books for UG Students ) at a time by using their library cards. The library plays a very important role in the learning of the students as most of the students are not able to buy the required number of books recommended by the teachers due to their financial constraints. Central library provides book bank facility for their all regular students. we give one set of books related to their theory and practical papers. This scheme is too beneficial for college students in term of course preparation.

The library is partially automated by using ILMS (Integrated Library Management System) koha. Due to the very huge collection and lack of manpower, the database creation of library books and other resources are under pipe line. Koha is fully featured, scalable library management system. Development is sponsored by libraries of varying types and sizes, volunteers.. and support companies worldwide. Koha is built using library standards and protocols such as MARC 21, UNIMARC, Z39.50, SRU/SW, SIP2, SIP/NCIP ,ensuring interoperability between koha and other systems and technologies, while supporting existing workflows and tools. Koha is distributed under the free software GPL version 3 or later. ILMS Koha including various modules-

About Koha

After creation of library resources database, we are able to access library books through OPAC. Thus, automation of the central library of the college not only makes it easier to find books, but it also makes it easier to access journals and some books online from a home computer or elsewhere by web OPAC.

Recently our college library subscribe NLIST which provides more than 6000 + e journals and 164300 + e books . In association with various department central library organise the awareness programmes for NLIST, NDL, Shodhganga

,epgpathshala etc.Due to more than 62 years old library, we have lot of reference books,competitative examination books,encyclopaedia,biography and religious books etc
